

### Client

A large HealthCare Service Organization

### Industry

Healthcare

### Business Need

Migrate from Oracle Streams to Oracle GoldenGate

### Solution

RheoData provided support to enable client migration of core replication logic from Oracle Streams to Oracle GoldenGate

### Result

The client now has the confidence to run Oracle GoldenGate in their environment and ensure the organization that replication process logic is the same.

### Technologies

Oracle Database 12c/19c  
Oracle GoldenGate 19c

### About RheoData

RheoData is a global systems integrator and disabled veteran-owned organization headquartered in Atlanta, Georgia. RheoData has built its business providing solutions across the IT landscape with architecture design/reviews, implementation, data replication, analytics, and remote services to ensure high-quality enterprise systems.

## RHEODATA HELPS LARGE HEALTHCARE SERVICES ORGANIZATION TRANSITION FROM ORACLE STREAMS TO ORACLE GOLDENGATE WHILE MAINTAINING CORE BUSINESS LOGIC

A large healthcare provider needed to rapidly move off Oracle Streams and quickly leverage Oracle GoldenGate to improve daily operations while ensuring the same business logic. RheoData delivered the solution.

### SOLUTION

RheoData worked with the client to architect, map, and implement the same logic built in Oracle Streams into Oracle GoldenGate. The process enabled the client to successfully implement a bi-directional Oracle GoldenGate implementation that meets organizational processing requirements and improves internal service level agreements.

### RESULT

By successfully demonstrating how to use Oracle GoldenGate's AutoCDR Column Group mappings, the client was able to ensure proper replication and ensure the organization that all data is replicated per established business logic. RheoData also demonstrated the monitoring and core functionality of Oracle GoldenGate.
